

We find the waterproofing and sealant jobs before they're spec'ed

Send us the tenders. We read the drawings, quantify the membrane, sealant and flooring each job needs, and hand your reps product-matched leads.

The waterproofing and sealant jobs go unread

One at a time

reps read tenders drawing by drawing, after hours

A handful a week

coverage capped by time, not interest

The rest get skipped

membrane, sealant and flooring leads lost on volume, not competition

3-4

tenders a week is all a rep can realistically read

Every one you don't read is waterproofing or sealant you don't get spec'ed.

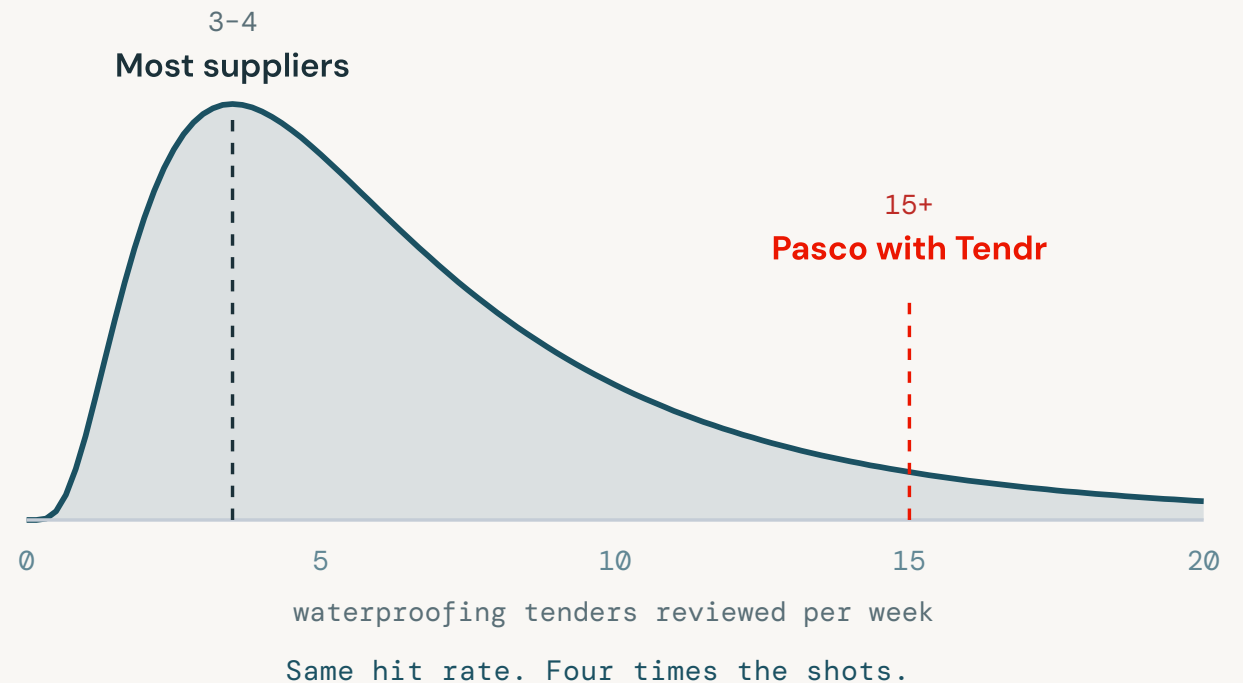

Coverage decides how much waterproofing gets specced

Every podium deck, wet area and movement joint on EstimateOne is membrane, sealant or pedestal you could supply

You can't control which jobs run — only how many you're across

More tenders read, more chances to be in the spec before it locks

Get in **before the spec locks** — or quote against it after.

THE PLATFORMS WE WORK ACROSS

We read the platforms your reps already watch

Same **95% accuracy**, whichever platform the tender comes from.

What we pull out of every waterproofing tender

Takeoff

Membrane m², sealant and caulking linear metres, pedestal and paver counts — measured from the drawings

Product match

The lines the spec calls for: Hypersil, PascoFlex, Aquastop waterstop, Buzon pedestals, Latham safety flooring

Scope read

Wet areas, podium decks, movement joints, below-grade waterproofing, fire-rated joints

Spec status

Product already named, or still open to substitution

Supply quantity

Enough to quote, or enough to brief the rep

Waterproofing tenders in. Product-matched leads out.

Quantity takeoff

Membrane, sealant and flooring measured from the drawings, line by line

Product schedule

Your waterproofing and sealant lines matched to scope, with quantities

Supply quote

Priced in your format, ready for the rep

Spec check

Know if you're already in the waterproofing spec, or need to get in

Early flag

Surfaced before the spec locks, while substitution is still open

WHY IT'S FAST AND RIGHT

Specialised tools. A career estimator checking every line.

We use specialised tools to read drawings and calculate quantities, so we cover far more waterproofing and sealant tenders than a rep reading one at a time. **Our estimator, 9 years in construction takeoff and tendering, checks every number.**

9 years

estimating experience in-house

95%

measured takeoff accuracy

24 hours

for a product schedule — 2 to 3 days
for a full supply quote

HOW IT WORKS

Five steps. Yours take minutes.

● YOU – MINUTES ● US

Product schedule in **24 hours**. Full supply quote in **2 to 3 days**.

Fixed fee per tender. No lock-in.

	Reps reading manually	Extra hire	Tendr
TURNAROUND	One at a time	Their queue	✓ 24 hours
COST	Rep hours off the road	\$90k+ salary	✓ Fixed fee per tender
COVERAGE	A handful a week	One person	✓ Scales with the pipeline

Quoted up front. Pay per tender. Your pricing stays confidential.

Bring us a live waterproofing tender

15 minute call. We'll tell you the fee, the turnaround, and the jobs your reps are missing.
